

# Hard oil DuraQuick

Timeless protection. Beautifully natural.

# AURO

Passion for natural paints

## 1 | PERFECT PREPARATION

### Wood Fill & Fix No. 528

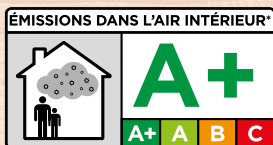

Outstanding floors begin with thoughtful preparation. **Wood Fill & Fix** has been developed to discreetly repair joints, fine cracks and minor imperfections in wooden flooring. Mixed with the sanding dust of the respective timber, the filler blends seamlessly with the natural tone and structure of the wood. Once sanded smooth, repairs become virtually invisible, leaving an even, refined surface ready for finishing.

The result is a calm, harmonious foundation — essential for a floor of enduring quality.

## 2 | NATURAL PROTECTION FOR DEMANDING INTERIORS

### Hard oil DuraQuick No. 529

**Hard oil DuraQuick** provides durable protection for interior wooden floors while preserving their authentic character. Its carefully balanced, water-thinnable formulation is based on ecological raw materials and protects without masking the grain or artificially deepening the tone. The natural clarity of the timber remains intact, enhanced by a soft, silky matt finish. Highly resilient and notably fast drying, DuraQuick is ideally suited to living spaces, offices and interiors where floors need to combine elegance with everyday practicality. Available in 0.75 L and 2.5 L.

### Healthy Indoor Living

Hard oil DuraQuick complies with the AgBB evaluation scheme and achieves the highest **A+ classification** under the French VOC regulation. A reassuring choice for interiors where air quality and wellbeing are a priority.

## Designed for Daily Life

From water and coffee to the demands of everyday use, Hard Oil DuraQuick forms a robust, hard-wearing surface that protects the wood while allowing it to age gracefully. It is a finish created not only for appearance, but for longevity.

## Efficiency without Compromise

The refined formulation allows for swift drying and timely recoating, enabling efficient application while maintaining a premium finish. Floors can return to use sooner — without sacrificing quality.

## Crafted from Natural Raw Materials

Made from carefully selected ecological ingredients, the oil reflects AURO's long-standing commitment to sustainability. The surface remains breathable, tactile and quietly sophisticated.

## Assured Underfoot

Classified R10 for slip resistance in accordance with DIN EN 16165:2021 (Method B), Hard oil DuraQuick is suitable for interiors where occasional moisture may occur, such as kitchens, entrance areas or reception spaces.

## Subtle Colour. Individual Expression.

For gentle tonal refinement, **Hard oil DuraQuick** can be tinted using the **COLOURS FOR LIFE** system in *white, grey, black, oak, walnut, dark walnut*. Each timber responds individually, creating depth and character unique to the surface. A discreet test application is recommended. Colour intensity can be softened by blending with the clear variant.

**COLOURS  
FOR LIFE**

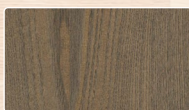

The professional system

The finish remains silky matt, durable and easy to maintain — ideal for interiors where aesthetic quality and resilience are equally valued.

## 3 | CARING FOR WOODEN FLOORS

### Floor Care Emulsion No. 431

Regular, considerate maintenance preserves the beauty of oiled floors. Our Floor Care Emulsion gently cleans and refreshes surfaces treated with AURO oils or waxes. Highly economical and based on natural raw materials, it supports the long-term appearance and integrity of the floor. Available in 1 L and 5 L.

## Deep Renewal with Active Oxygen

For thorough revitalisation, AURO's two-component cleaning system releases active oxygen upon application. This gently loosens organic residues and prepares the surface for renewed treatment — powerful in effect, yet respectful of the wood.

### 2K Parquet & Floorboard Cleaner No. 640

Suitable for untreated and oiled wooden floors. Effectively removes ingrained dirt and old residues without damaging the surface structure. Biodegradable, odour-neutral, vegan and ready for use once dry.

### 2K Exterior Wood Cleaner No. 641

Developed for decking, garden furniture, fencing and WPC surfaces. Cleans thoroughly without roughening the fibres and prepares exterior wood for subsequent care.

---

**Starter kits include spray unit and 400 ml of each component. Refill packs available in multiple sizes.**

**Biodegradable • Odour-neutral • Vegan**
